Analysis based on the provided report:

1) Sales and profit analysis:

Total sales remained relatively stable throughout the year. Lowest point of January 2024 marks the beginning of the business operations. Flactuations are tied to the seasonal drop or rise of demand.

Electronics is the most profitable category, while Accessories, Clothing, Household and Cosmetics make less, but a significant contribution to total profit.

Monitoring delivery statuses is important, as cancelled and returned orders may negatively affect overall performance.

2) Logistics and warehouses analysis:

Performances differ from one warehouse to another, which indicates the difference in demand according to the region.

Logistics expenses are concentrated in East Kazakhstan Region, which has the highest shipping costs, and Pavlodar Region.

Inventory levels vary accross warehouses. It may require redistribution to avoid shortages ot excess inventories.

The overall shipping cost ratio is only 0.02%, indicating that delivery expenses represent a very small share of warehouse revenue.

3) Clients and regions analysis:

Atyrau and Pavlodar have the highest number of customer orders, while Aktau has the lowest.

Customer registrations increased during 2024 and gradually declined toward the end of the reporting period.

Sales are relatively balanced across most regions, though Mangystau Region shows lower sales together with one of the lowest return rates. On the contrary, Akmola Region has the highest return rate despite maintaining average sales, which may require further investigation into customer satisfaction or delivery quality.

4) Employees and efficiency analysis:

The company employs 101 staff members with a total salary expense of 34,14M.

Average revenue per employee is approximately 2,95M, indicating overall workforce productivity.

Warehouse 7 has the largest workforce, while Warehouse 8 has the fewest employees.

Hiring activity was highest during 2024 and has slowed in recent periods, suggesting that workforce expansion has stabilized.
